

HALCON

DS25 - GLER80

EXTENDED
RANGE.
POWERFUL
DELIVERY.

When air to ground support is limited, the DS25-GLER80 is a ground launch booster designed to enable the DS-25 to reach to a maximum altitude of 18 km. The canister launched booster grants the DS-25 a range extension in trajectory reaching up to a ground target at 80 km. The design is aimed to strike ground targets varying from soft-skinned vehicles, command posts, individuals and soft bunkers.
