

# HALCON

## G-70

# PORTABLE PRECISION. LETHAL FIREPOWER.

### SHOULDER-LAUNCHED GUIDED MISSILE

The HALCON G-70 guided missile is a shoulder-launched infantry weapon that delivers high portability and precision to deliver tactical superiority for special forces, urban combat and other environments requiring close air support.

Featuring a continuous wave laser designator and seeker and single-soldier portability with up to three missiles, the G-70 brings lethal capabilities to modern combat scenarios. The system can be shoulder-launched or fired from a tripod.

# SPECIFICATIONS
