HUNTER 2-SJ

LOITERING MUNITION FOR ENGAGING ELECTRONIC WARFARE TARGETS

The HUNTER 2-SJ is a air-launched, fixed-wing, tube launched loitering munition designed to detect and destroy electronic warfare systems. The HUNTER 2-SJ flies autonomously to an intended target area to loiter and search for jammers. Once a target is identified, a remote pilot designates the target and activates engagement via man-in-the-loop control.

SPECIFICATIONS

MTOW	Up to 13kg
Payload	Up to 2kg
Total Flight time	45 minutes
Cruising Airspeed	25m/s
Operational Altitude	2,000m
Engine	Electric
Communication Range	Up to 50km
Wingspan	Up to 2.2m
Length	Up to 1.5m
