

HUNTER - N

PRECISION-STRIKE NAVAL LOITERING MUNITION

The Hunter N is a naval loitering munition that is launched from a portable ground launcher. With a maximum take-off weight of 4.5 kg and a payload of 500 g, the Hunter N provides aerial strike capabilities on designated targets up to 30 km from the launch point. The Hunter N with a wingspan of 1.12 m flies autonomously to an intended target area, search for targets and attack the identified target.
