THUNDER-4

POWERFUL
PAYLOAD.
ACCURATE
DELIVERY.

The Thunder-4, another member of the Thunder family, is a cost-effective, short-range, guidance kit that can be fitted to the MK-84 general purpose aerial munition.

Thunder-4 combines an inertial measurement unit (IMU) and global navigation satellite system (GNSS) measurements to guide the weapon to its target (GAINS). A semi-active laser (SAL) seeker configuration further improves accuracy performance against designated targets.
