

SIATT

MANSUP-ER

OPERATIONAL FLEXIBILITY. LONG-RANGE IMPACT.

The MANSUP-ER is a versatile, long-range, surface-to-surface antiship missile system with land attack capability. Not only does the system offer adaptive sea skimming, but also unlimited overland flight, terminal manoeuvres, and simultaneous (time on target) missiles attack.

This all-weather system features an onboard altimeter, flexible 3D waypoints and an active radar seeker. With an endurance of 17 minutes, speed of 954 km/h and range of 200 km, the MANSUP-ER represents a disruption to the status quo and a new tool for naval strategists and planners.

SPECIFICATIONS

Range	200km
Endurance	17min
Speed	954km/h
Payload	150kg warhead
Product dimensions	5.8m X 0.4m

KEY FEATURES:

- Surface to surface
- Sea skimming and unlimited overland flight
- Land attack capability
- All weather conditions
