

MANSUP

PRECISION ATTACK. FLEXIBLE DEFENCE.

SURFACE-TO-SURFACE, ANTISHIP MISSILE, IDEAL FOR COASTAL DEFENCE

The MANSUP system is a surface-to-surface antiship missile with land attack capability that represents a new resource for mission planners and those responsible for coastal defence. The MANSUP missile flexibility means it can be launched from warships or land vehicles.

With a range of 70 km, this all-weather system offers adaptive sea skimming and onboard altimeter, as well as a jamming-resistant, active radar seeker.

SPECIFICATIONS

KEY FEATURES

- On-board altimeter
- All-weather capability
- Sea-state adapted sea skimming
- Launches from warships or land vehicles

SPECIFICATIONS

Height	5.78 m
Diameter	350 mm
Maximum wingspan	1,135 mm
Range	70 km
Speed	Transonic
Navigation	Inertial
Terminal guidance	Jamming-resistant, active radar seeker
Propulsion	Solid propellant
Payload	150 kg warhead
