

AGK120

ON GROUND. ON TARGET.

PRECISION ARTILLERY GUIDANCE KIT

The ADVANCED CONCEPTS AGK 120 is a precision artillery guidance kit for ground forces that dramatically enhances the effectiveness of 120mm munitions with advanced targeting for as little as 10m CEP and 90% probability.

With a minimum range of 7 kilometres and available in two different guidance configurations – semi-active laser with satellite assistance or satellite guidance only – the AGK 120 can meet diverse mission conditions and requirements.

SPECIFICATIONS

KEY FEATURES

- Launched via M120 launching platform
- Complies with STANAG 4157 and AOP-20 Test D2 standards
- SAL is compliant with STANAG 3733 laser designator
- Minimum 7 km range with maximum propellant charge

TECHNICAL DATA

Diameter	119.5 mm
Length	1065 mm
AGK 120 mm Semi-Active Laser Guidance Version	- 10m CEP with a 90% probability - Compliant with laser designator that has 1064 nm / 15 ns (wavelength /pulse duration)
AGK 120 mm Satellite Guidance Version	30m CEP with a 90% probability
Compliant with	Beidu and GPS
