

HUNTER 5

AUTONOMOUS LOITERING MUNITIONS

The HUNTER 5 is a container- launched, fixed-wing, tube launched loitering munitions that provide aerial strike capabilities on a designated target up to 100km from the launch point. The loitering munitions fly autonomously to an intended target area and loiter while searching for targets. Once a target is identified, a remote pilot designates the target and activates engagement via man-in-the loop control.

SPECIFICATIONS

Hunter 5

MTOW	Up to 50kg
Payload	5kg
