

H75

LOW NOISE. HIGH PAYLOAD.

The ADVANCED CONCEPTS H75 is a tandem-wing, air-released smart bomb delivering a heavy warhead payload with a low-noise signature. Designed for attacks at stand-off ranges of up to 36 kilometres, the platform is suitable for neutralising personnel, soft-skinned vehicles, and unprotected structures.

With an EMSAD fuse and 75-kilogram blast fragmentation warhead, the H75 brings high lethality against a wide range of ground-based targets.

SPECIFICATIONS

KEY FEATURES

- High lethality
- Air-drop launch
- Heavy warhead capability
- Low-noise signature

TECHNICAL DATA

Length	1,670 mm
Wingspan	2,016 mm
Payload	75 kg
Range	up to 36 km
Cruise speed	100 m/s
MTOW	up to 100 kg
Warhead type	Blast fragmentation
Fuse type	EMSAD
