

HUNTER SP

AUTONOMOUS SOLDIER-PORTABLE LOITERING MUNITION

The HUNTER SP is a small, soldier-portable, fixed-wing, tube launched loitering munition, launched from a single tube. Suitable for close-range tactical ISR and strike operations, the HUNTER SP autonomously flies to an intended target area and loiters while searching for targets. Once a target is identified, the remote pilot designates the target and activates engagement via man-in-the-loop control.

SPECIFICATIONS
