

DESERT DART AND LAUNCHER

AFFORDABLE FIREPOWER. IMPROVED IMPACT.

ULTRA-LOW-COST LOITERING MUNITION

The ADVANCED CONCEPTS Desert Dart and Desert Dart Launcher represent an ultra-low-cost loitering munition option that because of its price, expands military and special forces capabilities and mission configurations.

The six-unit Desert Dart Launcher is powered by compressed gas that launches the Desert Dart munition. The low unit cost means more munitions can be launched more often, whether to overwhelm enemy defences or to improve mission success or impact.

SPECIFICATIONS
