WE ARE EDGE

ADVANCED TECHNOLOGY FOR DEFENCE & BEYOND

We live in an accelerating world. Characterised by uncharted frontiers, the future is empowered by advanced technology that is galvanising a new breed of players. At the edge of these frontiers exist no limits – where boundless opportunities await.

Transforming how we live, and ensuring a more secure future, is what we do. We are EDGE; and our mission is simple: to bring innovative technologies and services to market with greater speed and efficiency.

We are driving the development of sovereign capabilities for global export and for the preservation of national security, working with front-line operators, international partners, and adopting advanced technologies.

We are EDGE. We enable a secure future.

OUR PURPOSE

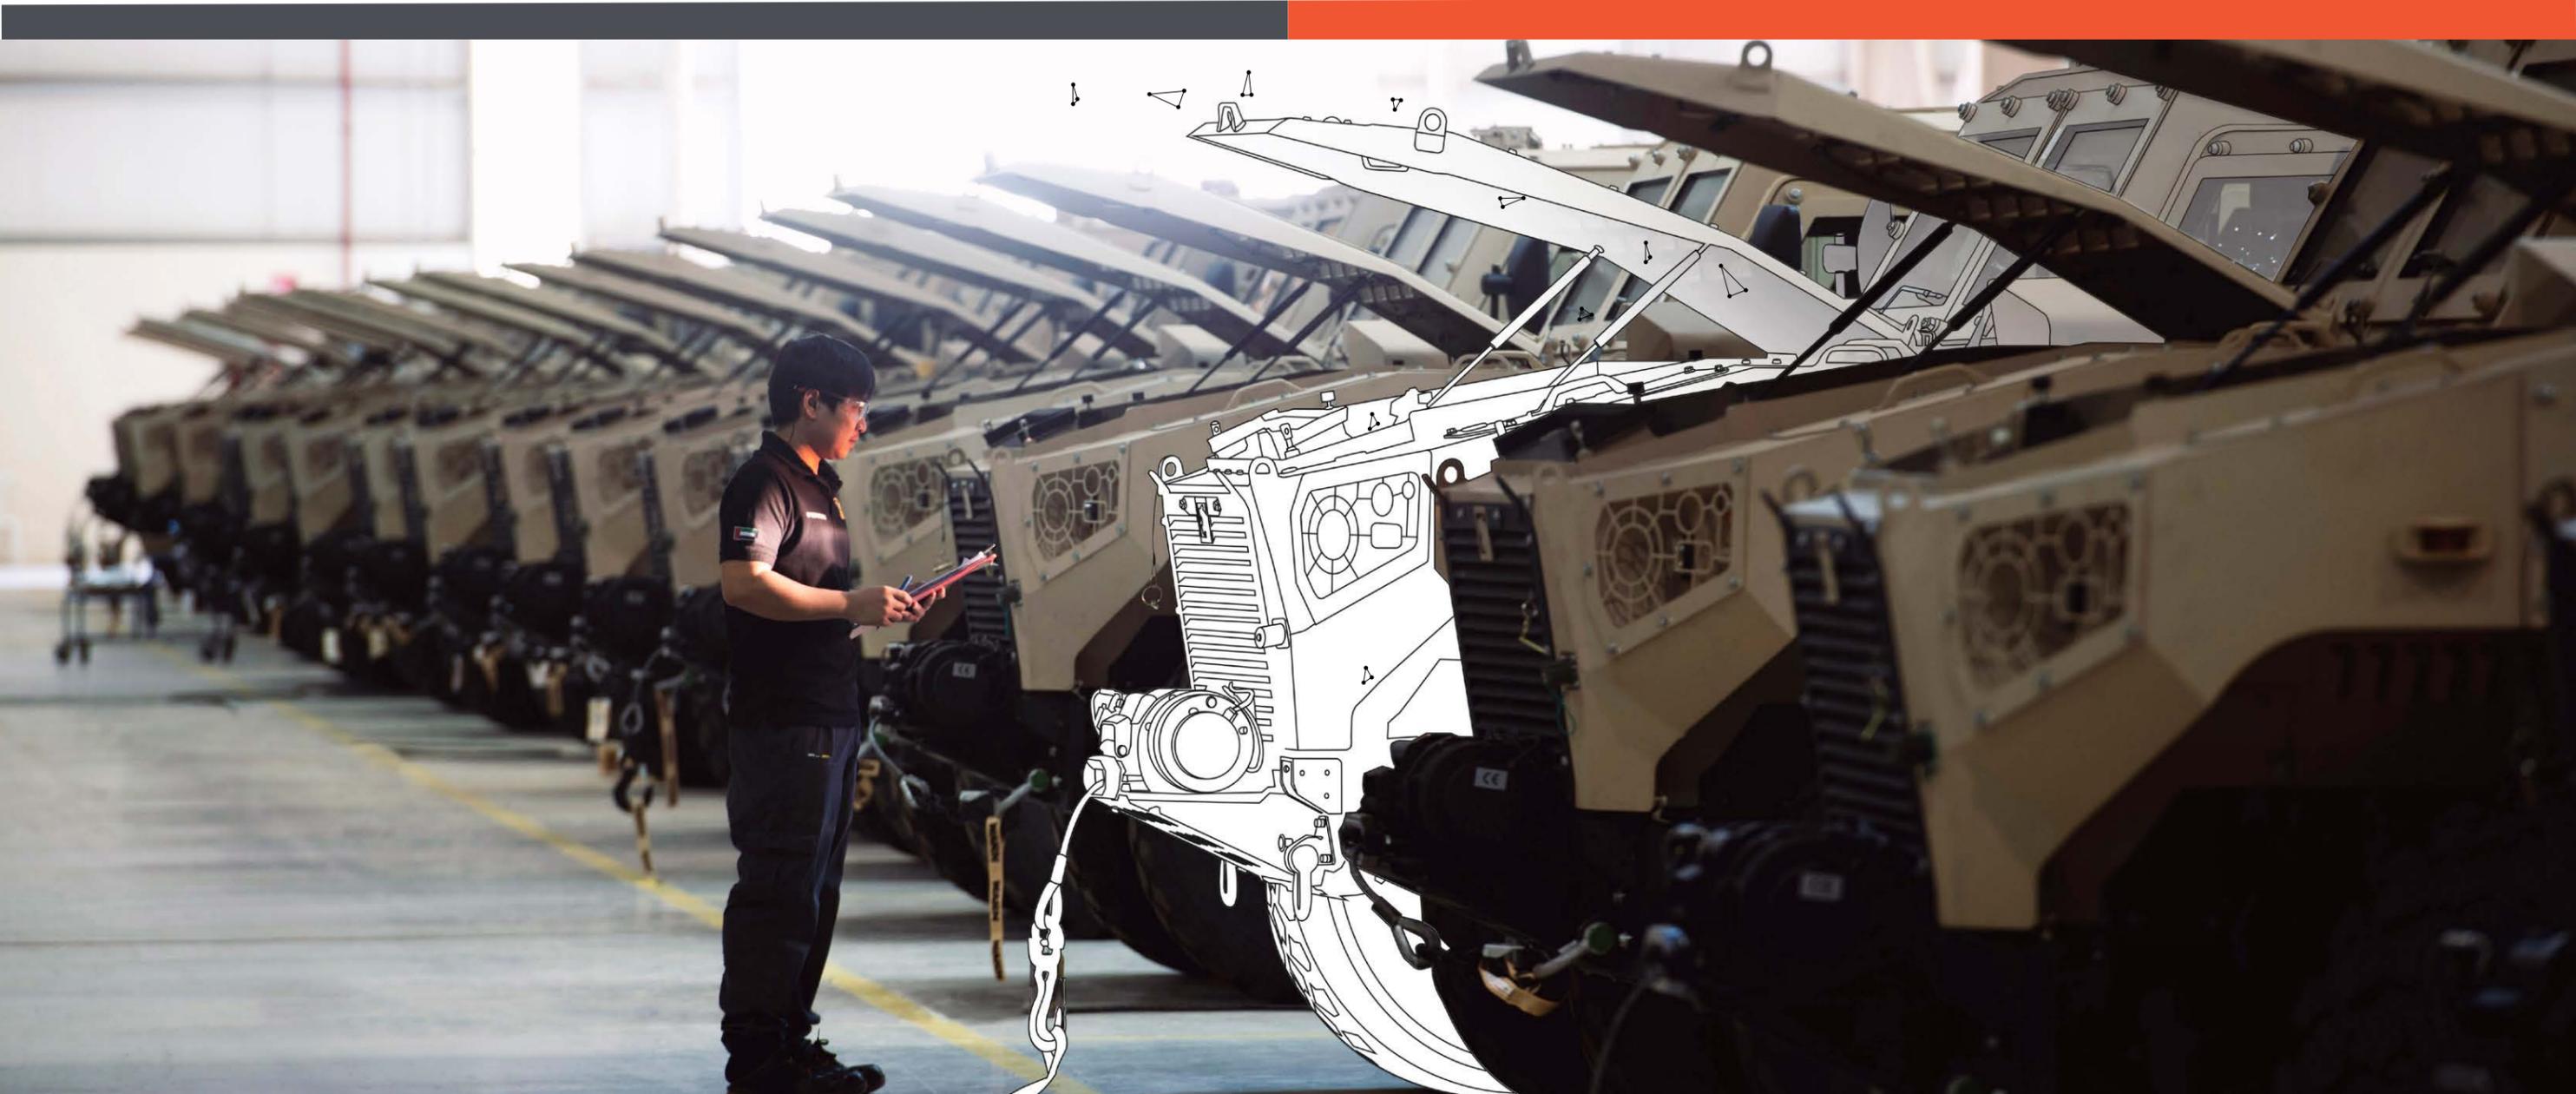

At EDGE, we invent disruptive products, end-to-end services and trailblazing solutions that help protect lives, lower costs and simplify business.

Anticipating the risk scenarios of tomorrow, we focus on bringing together commercial innovations with precise defence solutions. Our goal is to be proactive and future focused - not simply accelerating in one space, but creating value that has tangible benefits for everyone.

OUR DIFFERENCE

We shape the foundations of our vision by collaborating with the industry's most talented thought leaders, risk-takers, and innovators. Seeking solutions everywhere, our domains and partnerships know no bounds: big or small, start-up or established, local or global. We are agile where others are inflexible.

As firm believers in open architecture, we don't lock our clients down with inflexible, dead-end black boxes.

OUR EDGE

WELCOME TO THE AGE OF OPPORTUNITY

Tomorrow is just over the horizon - a future emboldened by limitless imagination. As one of the world's leading advanced technology and defence groups, EDGE is creating opportunities in critical domains including Precision Munitions, Autonomous Systems, Naval, Land Systems, Small Arms, Electronic Warfare, Intelligence, Training, MRO, and Cyber Defence.

Each of these opportunities is shaped by advances in artificial intelligence, encouraging us to dream the impossible and create the unimaginable. In real-time, we are reshaping our ability to respond to the world's most complex challenges, enhancing integration, communication, and precision at all levels.

We never see problems - only opportunities to innovate at speed and to bring new innovations to market with agility, and we are building a strong industrial blueprint as a pioneer of indigenous capabilities and solutions to meet specific international requirements.

At EDGE, we are adopting best-in-class frameworks and Industry 4.0 technologies to become a global beacon of modern digitisation, driving higher quality and efficiency, and creating clear paths for talent to thrive.

OUR SOLUTIONS

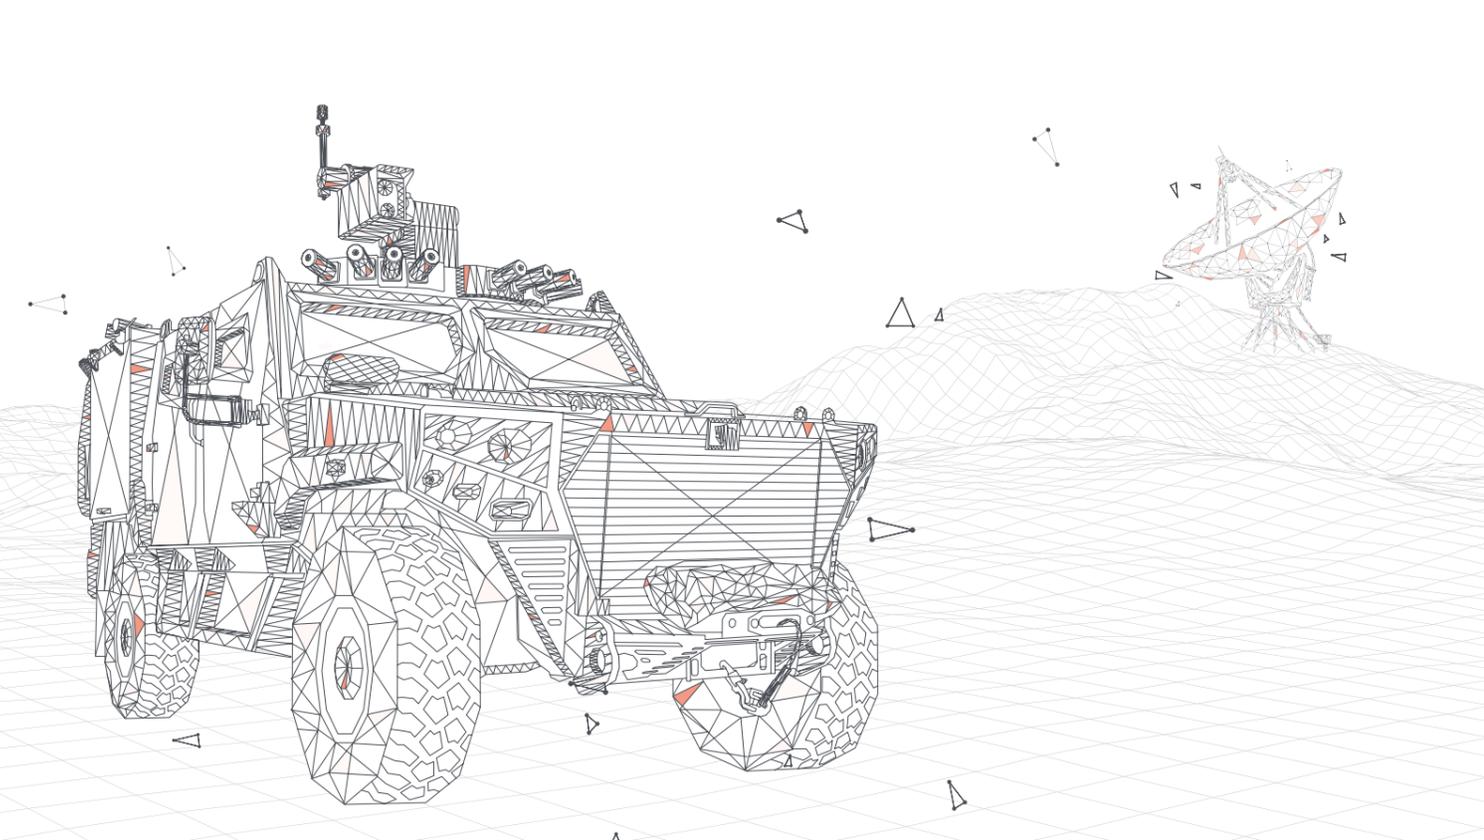

HIGH PERFORMANCE PARTNERSHIP

Our passionate and diverse multinational teams are our most valuable asset – and the backbone of our success. Backed by significant commitments to people, resources and R&D, we give them the freedom to innovate and perform. Dynamic and entrepreneurial, they are key to our groundbreaking research, and to our evolving partnerships with the world's elite universities, research institutions and defence and security specialists.

TRANSFORM & DISRUPT

At EDGE, we use the transformative power of advanced technology to tackle the challenges of tomorrow head-on – from managing costs and personnel to evolving battlefield dynamics in ever more diverse theatres of engagement.

We're a disrupter, a transformer and a force for change in an industry ripe for evolution. By putting pioneering tech at the heart of everything we do, and fostering the exchange of ideas and technologies between the defence and commercial sectors, we're enabling growth and building a more secure future, a world away from the frontline.

EDGE CLUSTERS

Each of our expert clusters specialises in its own unique area and directs the work of our entities and trusted partners, aligning with our technology and market priorities.

Our specialist clusters are the beating heart of our business and are centres of excellence in their own right. Structured to consolidate skills and experience, they each foster cross-collaboration and knowledge sharing. The result is an operating model that focuses on outcomes – and gets results.

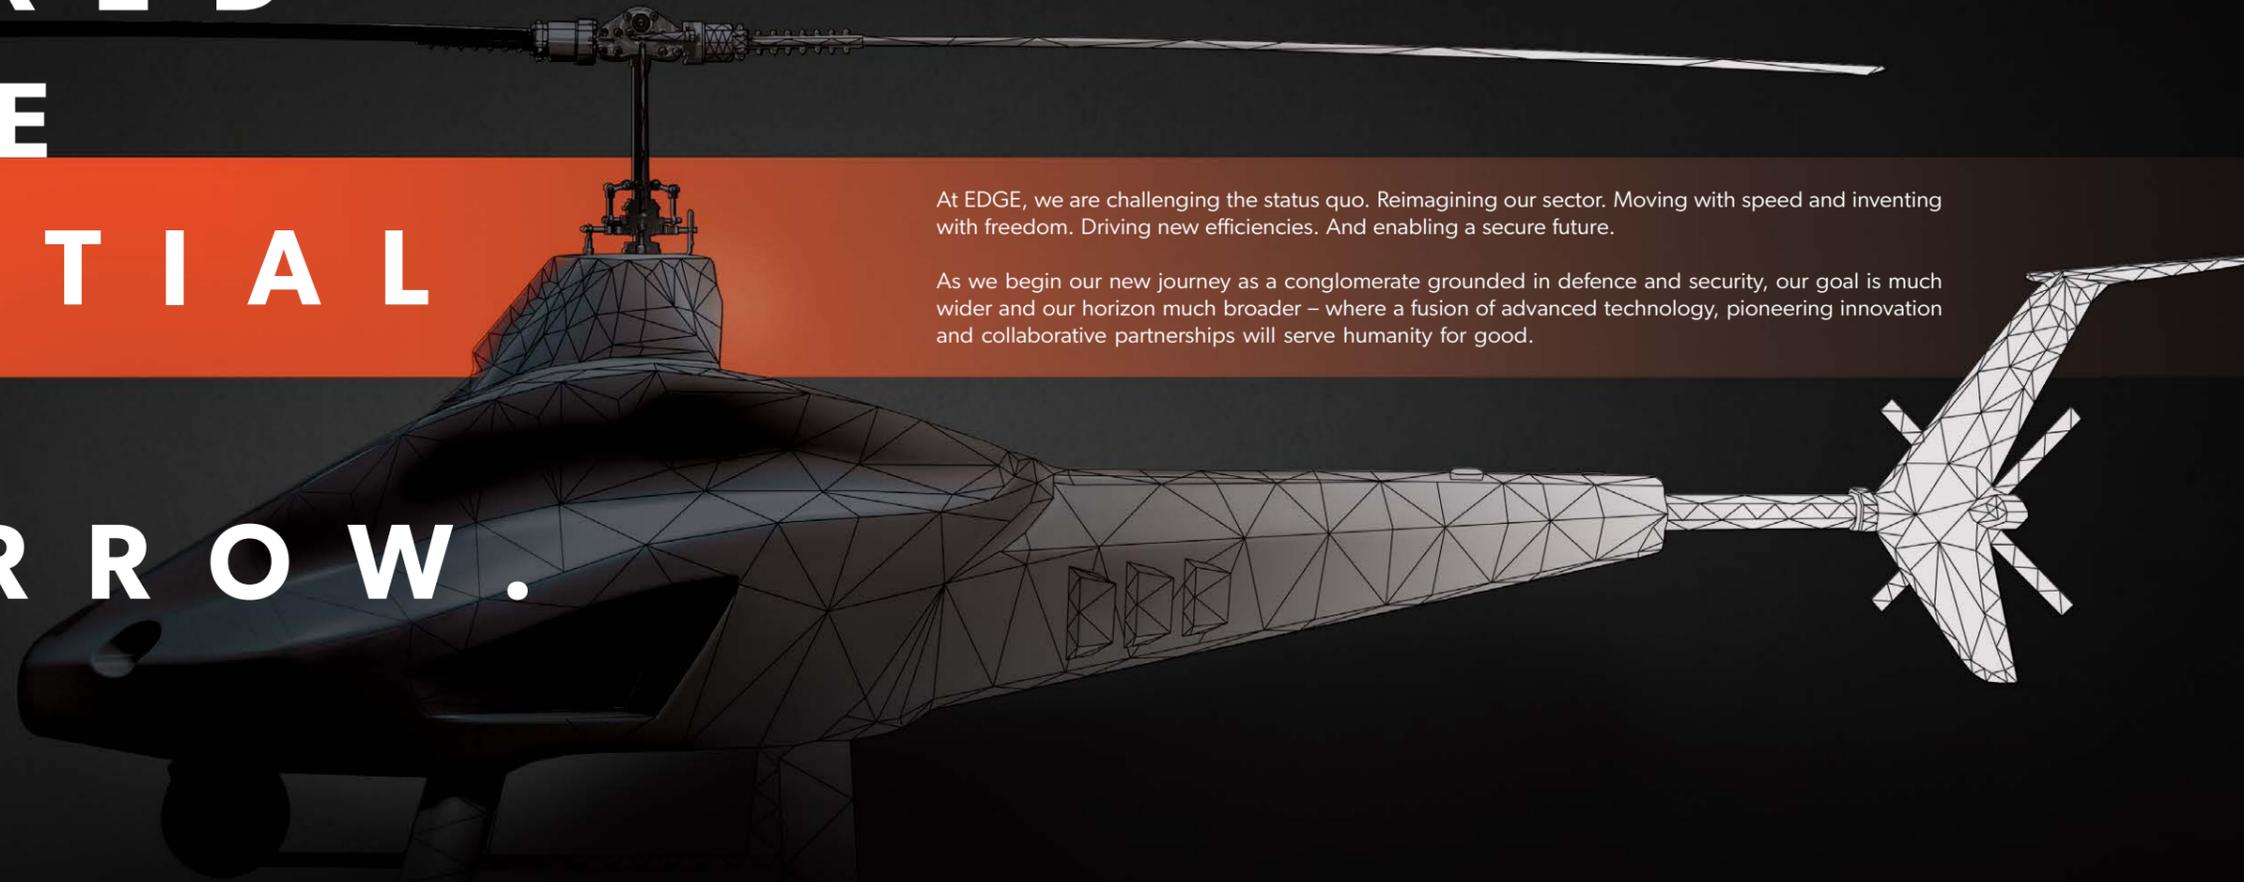

EDGE ENTITIES

Our entities and trusted partners focus on developing breakthrough advances by innovating, designing, building, operating, maintaining and supporting the technologies, platforms and services that our customers rely on every day.

INSPIRED
BY THE
POTENTIAL
OF
TOMORROW.

At EDGE, we are challenging the status quo. Reimagining our sector. Moving with speed and inventing with freedom. Driving new efficiencies. And enabling a secure future.

As we begin our new journey as a conglomerate grounded in defence and security, our goal is much wider and our horizon much broader – where a fusion of advanced technology, pioneering innovation and collaborative partnerships will serve humanity for good.
