

FAST RESPONDER 20/35/200

**LOW OBSERVABILITY.
HIGH PRECISION.**

AUTONOMOUS FIXED-WING LOITERING MUNITION

The ADVANCED CONCEPTS Fast Responder is a GNSS-guided autonomous, fixed-wing loitering munition. Featuring low observability, low cost, and a 400km range, this munition puts an effective precision weapon in the hands of operators and planners.

The 50kg payload, combined with a cruising speed of 200 m/s and 30-minute endurance, means the Fast Responder can be used as part of a tactical force-multiplication or force-projection approach.

SPECIFICATIONS

KEY FEATURES

- Low cost
- Low observability

SPECIFICATIONS

	FR-20	FR-35	FR-200
MTOW:	125kg	250kg	620kg
Payload:	20kg	35kg	200kg
Endurance:	30 min	30 min	30 min
Cruise Speed:	150 m/s	150 m/s	150 m/s
Operational altitude:	20000ft	20000ft	20000ft
Propulsion system:	Jet engine	Jet engine	Jet engine
Maximum Range:	270km	270km	270km
