

HUNTER INTEGRATION (NIMR VEHICLES)

MOBILE INTEGRATION. RAPID DEPLOYMENT.

VEHICLE-MOUNTED LOITERING MUNITION LAUNCHING SYSTEM

The ADVANCED CONCEPTS HUNTER Integration system for a vehicle-mounted loitering munition launching system provides a solution for mobile launching. It enables aerial identification and designation of targets, and rapid deployment close to targets, whether personnel or vehicles, either soft-skinned or armoured.

The HUNTER Integration system provides for installation of Hunter SP and Hunter 2S launchers on NIMR vehicles. This equips these platforms to rapidly deploy extended-endurance, long-range, high-lethality Hunter SP and Hunter 2S loitering munitions.

SPECIFICATIONS

KEY FEATURES

- Multiple loitering munition options
- Extended endurance
- Long range
- High lethality
- Rapid deployment

SPECIFICATIONS

Dimensions	Fits on 2.2 m x 2 m cargo bed
1 x Hunter 5 & 10 launcher	(1 x Hunter 5 & 10 loitering munitions)
1 x Hunter 2S launcher	(8 x Hunter 2S loitering munitions)
1 x Hunter SP launcher	(9 x Hunter SP loitering munitions)
